

CHAINLESS SX105

The Chainless SX105 rebaler utilises the Chainless feed-out system which has been well-proven on thousands of farms all over the world, and is renowned for its simple patented design that is reliable, easier-to-use and handles round and square bales. Developed specifically for the use of re-baling, breaking down bales for mixer wagons, and processing hemp. The Chainless SX105 efficiently teases apart large round bales in less than 2 minutes which provides huge time, cost and fuel savings.

Low-speed rotors tease the bale apart while preserving the quality of the hay

Platform height indicators make operation simple, quick and easy

Non-corrosive polyethylene platform, guides the bale into the variable feed rotors

Fully enclosed drive system keeps hay out of the working parts

Mounting pads allow the SX105 to be easily mounted to a frame or the back of a pickup truck. Model is shown with optional wheels.

Hydraulic controls are simple to operate and low-maintenance.

- Preserve hay quality for longer
- Substantially reduce handling time and cost
- Eliminate hours of back-breaking labor or expensive equipment to collect small bales
- Increase the value of your hay
- Store the large bales and re-bale the small squares on demand or during winter
- One tractor can run both the square baler and the rebaler

SPECIFICATIONS

BALE SIZES ROUND: Up to 5' x 6'
BALE SIZES SQUARE: All sizes (over 6' long requires optional platform extension)
BALE WEIGHT: Up to 1500 kg
UNIT WEIGHT: 680 kg

CAPACITY: 1 bale (round or square)
LENGTH: 2185 mm
MIN/MAX WIDTH: 1905 mm / 2693 mm
MIN/MAX HEIGHT: 1169 mm / 2590 mm
HYDRAULICS REQUIRED: 2 x double-acting, (30-60litres/min), 2250-3000 psi
